HOT OFF THE PRESS!

NEW ADDITIONS TO THE RANGE OF GRASSES AVAILABLE AT ALC!

We have been evaluating the needs of the turf market and have added two new varieties to the range ALC produces. We have available, a new generation fine textured Buffalo, named Sapphire. This grass was selected for its soft fine leaf and great shade tolerance. There are also many other benefits, which we will be happy to explain to you.

The second grass is Empire Zoysia, which is showing many benefits for both commercial and domestic areas. This grass has great survival ability. Empire will fit well into a low maintenance program and equally will provide that great "turf look" if well managed.
